Overview

First of all, thank you for your trust and purchase of our LED series products. For your better safety and better use of this new lamp, please read this instruction manual carefully before use and operate according to the regulations to avoid misuse and cause unsafe factors and damage to the lamp.

Precautions

1. Please have professionals install and debug the lamps. Non-professionals are strictly prohibited from dismantling the lamps privately.
2. Please turn off the power when not using the lamps or cleaning the lamps.
3. Do not use in a humid environment (except waterproof lamps) and keep away from flammable materials at least 0.5 meters away.
4. Do not look directly at the light of the lamp with your naked eyes, which may cause damage to your eyes.
5. Do not change the internal circuit structure of the lamp without permission, which may cause the lamp to short-circuit or burn out.

Key operation instructions

MENU: Function key   UP: Plus key   DOWN: Minus key   ENTER: Confirm key

Button Description

MENU function key:

Pressing the function key MENU will cycle through the functions in Table (I). The first 1-2 digits of the digital tube represent the current function. The last 2-3 digits represent the speed, effect and other parameters of the function; press the UP or DOWN key to modify the parameter value; press the ENTER key to confirm.

UP plus key: Press this key to add, and press for more than 2 seconds to add continuously;

DOWN minus key: Press this key to subtract, and press for more than 2 seconds to subtract continuously;

ENTER confirmation key: Press this key to save the currently set parameter function, and automatically run the saved function the next time you start the machine.
