

# Aura B-EYE 760 User Manual

## **Guangzhou Mitek Light Co.,LTD**

Email: info@miteklight.com Website: www.miteklight.com

Add: No. 21 Dongfeng Avenue, Automobile Industry Base, Huadu District, Guangzhou

#### **TECHNICAL PARAMETERS**

#### **Light source**

Voltage: AC90-240v 50-60HZ

Rated power: 550W

Light source: 7x 60W (4in1 RGBW) high brightness LEDs

Filament Aura: 12x 3W (3in1 RGB) LED filament

**Optical** 

Beam angle: 7-45°

Controls

Channel: Built-in 6 channel modes 20/21/30/36/57/78/93CH

Control: DMX512, Auto, RDM, Art-Net (Support for additional installation)

Display: LCD display with touch buttons

**Effect** 

Strobe: 1-25HZ with multiple strobe effects

Dimming: Four dimming effect (Linear/Square/I Sequare/Scurve) 0-100% linear dimming. Optical effect: High precision integrated structure PMMA lens, high transparency quartz glass light pipe, creating a softer dyeing range. Latest Aura filament pixel effect.

Color: RGBW color mixing with very bright and vibrant saturated colors, as well as soft

pastels and white tones. Tungsten Emulation Option.Virtual Color Wheel.

Macro effects: Multiple built-in macros with control of foreground color, background color,

speed and direction. 3D video mapping of fixture beam pixels and/or Aura filaments.

High-speed pan, tilt and zoom

Construction

Pan: 540°+16bit fine : Tilt: 270°+16bit fine

Temperature control: Intelligent temperature control, capable of automatically adjusting the

speed of the cooling fan and overheating protection Body material: High temperature resistant plastic

IP Rating: IP20

Weight&Dimension

Fixture dimension: 35.6×28×45cm

NW.: 14.6kg

Carton size (1pc/ctn): 44\*36\*53cm

GW.: 18.5 kg

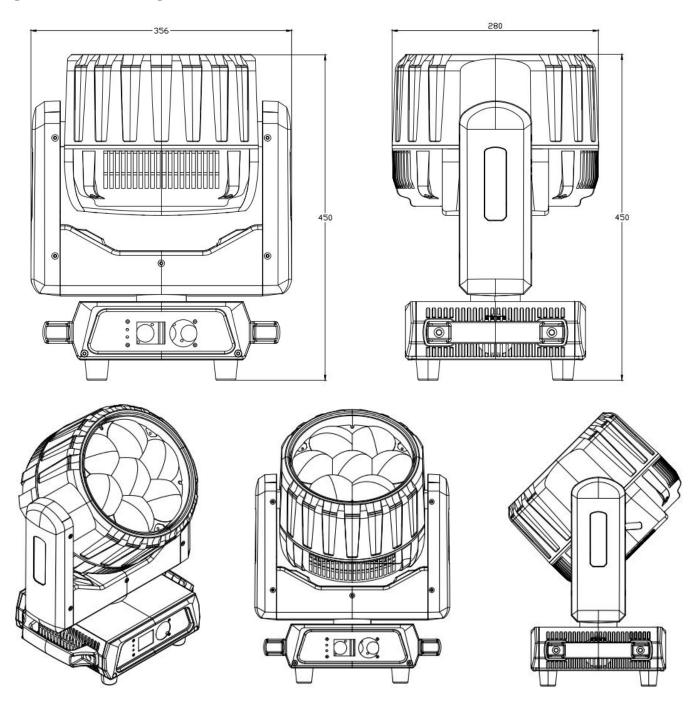

Flight Case Size: 70\*40\*69cm (2pcs/case)

GW:51kg

Flight Case Size: 88x59.5x70.5cm (4pcs/case)

GW:94.9kg

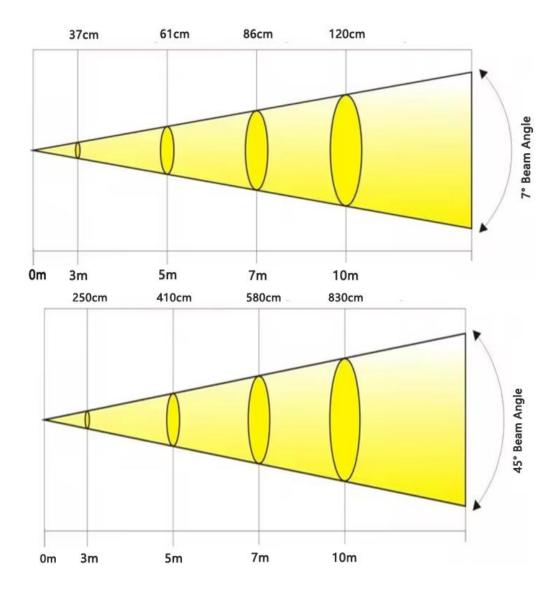

## **SIZE DRAWING**

## **Psychometric Data**

LUX Data of 7 degree beam angle:

## 1.Unpacking

Thank you for choosing our IP20 7\*60W bee eye moving head light. For proper and safe use, please read the instructions carefully before installing and using this product. This specification contains important installation and application information. Please strictly follow the operation procedures when installing and operating the product. At the same time, please keep this instruction manual properly.

Our 7\*60W bee eye moving head wash beam light uses a new beautiful high temperature resistant plastic housing. This product strictly follows the CE standard for design and production, in line with the international standard DMX512 signal protocol, can be used separately for control, can also be used online, with fast rotation, low noise, powerful features, suitable for large and medium-sized concerts, theaters, studios, nightclubs and bars and other places,

This product uses high brightness and stable 7pcs 60W 4in1 LEDs. Please remove the package carefully, check whether the product is damaged during transportation, and check whether the following contents are complete.

### Safety Instructions

**CAUTION!**Be careful with your operations. With a dangerous voltage you can Suffer a dangerous electric shock when touching wires!

This device has left the factory in perfect condition. In order to maintain this condition and to ensure a safe operation, it is absolutely necessary for the user to follow the safety instructions and warning notes written in this user manual.

#### Important:

Damages caused by the disregard of this user manual are not subject to warranty. The dealer will not accept liability for any resulting defects or problems.

If the product has been exposed to extreme unstable temperature conditions (e.g., after transportation), do not supply the product immediately because water drops due to temperature changes may damage the product. Please use the product has returned to normal temperature.

This product can be used in the voltage range of 100-240V, and is used for outdoor products. Please ensure that the ground voltage is not higher than the tolerable range of the product!! The power plug must be plugged into a protective class I socket. Green or tea-cyan conductors must be grounded.

Please check the product-level power cord frequently. Ensure that the power cord is not folded or damaged and not connected to other wires! Special attention is required when connecting the power cord or the related wiring. Unplug the power supply without using the product or before cleaning.

Before using the product, please be familiar with the operation function of the product. Please do not expose children or no professionals to the product.

Please do not shake this product. Do not use brute force when installing or operating the product. Do not allow unprofessionals to operate the product. Most of the damage is caused by an unprofessional operation.

The product is not equipped with relevant repair accessories. Product maintenance and repair can only be carried out by professionals!

Please do not change this product without authorization, otherwise the product may be damaged, so the damage caused is not covered by the warranty. Also, unprofessional operations can lead to short circuits, burns or electric shocks, and so on.

#### **Operation Instructions** (Do not let strong light direct shoot onto the lens !!!)

- -The fixture is for beam wash and effect use.
- -Don't turn on the fixture if it's been through severe temperature difference like after transportation because it might damage the light due to the environment changes. So make sure to operate the fixture until it is in normal temperature.
- -This light should be keep away from strong shaking during any transportation or movement.
- -Don't pull up the light by only the head, or it might cause damages to the mechanical parts.
- -Don't expose the fixture in overheat, moisture or environment with too much dust when installing it. And don't lay any power cables on the floor. Or it might cause electronic shock to the people.
- -Make sure the installation place is in good safety condition before installing the fixture.
- -Make sure to put the safety chain and check whether the screws are screwed properly when installing the fixture.
- -Make sure the lens are in good condition. It's recommended to replace the units if there are any damages or severe scratch.
- -Make sure the fixture is operated by qualified personnel who knows the fixture before using.
- -Keep the original packages if any second shipment is needed.
- -Don't try to change the fixtures without any instruction by the manufacturer or the appointed repairing agencies.
- -It is not in warranty range if there are any malfunctions from not following the user manual to operate or any illegal operation, like shock short circuit, electronic shock, lamp broke, etc.

## Mounting and Installation

**Cautions:** For added protection mount the fixtures in areas outside walking paths, seating areas, or in areas were the fixture might be reached by unauthorized personnel.

Before mounting the fixture to any surface, make sure that the installation area can hold a minimum point load of 10 times the device's weight.

Fixture installation must always be secured with a secondary safety attachment, such as an appropriate safety cable.

When hanging, removing or repairing the product, it is forbidden to stand under the installation point.

Please ensure that this product should be installed at least 0.5 meters away from the flammable materials.

Please remember to use the safety rope as a safety guarantee, in case the accident is dropped quickly.

**Hanging point:** the top hanging requires that the installation personnel must be experienced, including calculating the load-bearing requirements, the installation materials used, and the periodic inspection of the

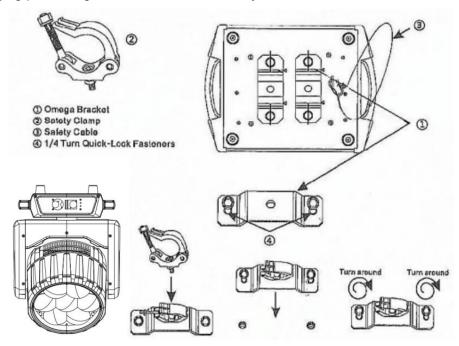

safety status of the installation materials and products. If you lack this knowledge, please do not try to install it yourself. If not incorrectly, it may lead to serious consequences such as personal injury.

Make sure that all the required hanging and installation steps are completed before the product is powered on.

#### **Clamp Mounting:**

The product provides a unique mounting bracket assembly that integrates the bottom of the base, the included "Omega Bracket," and the safety rope rigging point in one unit (see the illustration below).

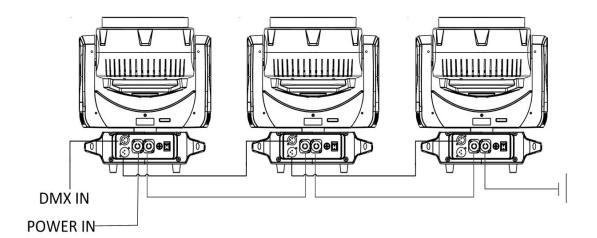

When mounting this fixture to truss be sure to secure an appropriately rated clamp to the included omega bracket using a M10 screw fitted through the center hole of the "omega bracket". As an added safety measure be sure to attached at least one properly rated safety cable to the fixture using on of the safety cable rigging point integrated in the base assembly

Regardless of the rigging option you choose for our fixture, always be sure to secure your fixture with a safety cable. The fixture provides a built-in rigging point for a safety cable on the hanging bracket as illustrated above. Be sure to only use the designated rigging point for the safety cable and never secure a safety cable to a carrying handle.

#### **DMX-512 control connections**

Connect the provided the male connector of XLR signal cable into the signal output port of the controller and the female connector into the signal input port on the back board of the product. You can connect multiple products in series. The signal line needs to be 3-pin, shielded, and with XLR input and output connectors. Please refer to the diagram below.

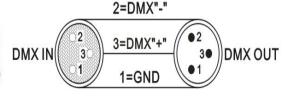

DMX Output 3-Pin XLR Socket

DMX Input 3-Pin XLR Socket

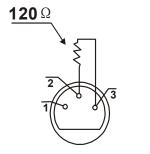

1: Ground 2: Data (-) 3: Data (+)

#### DMX-512 connection with terminal (circuit connection)

For installations where the DMX cable has to run a long distance or is in an electrically noisy environment, such as in a discotheque, it is recommended to use a DMX terminator. This helps in preventing corruption of the digital control signal by electrical noise. The DMX terminator is simply an XLR plug with a 120  $\Omega$  resistor connected between pins 2 and 3,which is then plugged into the output XLR socket of the last fixture in the chain. Please see illustrations below.

## **DMX Channels**

| 20CH | DMX<br>Value | Function                 | Details |
