

B-EYE K15R

User Manual

Guangzhou Mitek Light Co.,LTD

Email: info@miteklight.com

Website: www.miteklight.com

Add: No. 21 Dongfeng Avenue, Automobile Industry Base, Huadu District, Guangzhou

TECHNICAL PARAMETERS

Light source

Rated voltage: AC100V~240V 50 / 60Hz

Input power: 750W

LED: 19*40W 4in1 RGBW LEDs+74*0.5W LED RING

Approved life: 50,000 hours

Optical

Color: red, green, blue, and white

Focus: 4° -60 ° DMX linear focus, with autofocus function

Color temperature regulation: built-in CTO DMX linear dimming

Controls

Control mode: 32 CH, 34 CH, 46 CH, 78 CH, 92 CH, 97 CH, 99 CH; 7 channel control modes, standard DMX512 protocol, RDM protocol

Control interface: DMX512 interface (3 core / optional 5 core), power cord hand-in-hand socket

Display function: 1.77-inch LCD screen, Chinese and English bilingual menu, sensor fault display, temperature display

Effect

Effect mode: (vortex, kaleidoscope)

The front mirror plate is variable to infinite rotation, seamless splicing mirror plate, unspherical lens structure, single point control light belt effect: strobe, horse racing effect, with built-in program

Electronic strobe, 0.3~25 times / second, can choose synchronous, asynchronous random strobe

Dimming: electronic dimming 0~100% linear adjustment, with gamma curve dimming frequency 1.2K~25K adjustable, with macro instruction dimming linear stable smooth without flashing, using stable constant current drive and power supply, suitable for video shooting

Construction

Rotation Angle: XY axis is driven by high-speed silent 60 three-phase motor, with high-precision imported Hall positioning device, so that the operation positioning is more accurate, when the error can be automatically returned, horizontal and vertical speed adjustable; XY axis rotation function and reverse function,

Horizontal 540° (16 bit precision scan), vertical 270° (16 bit precision scan)

Dormant function: using advanced technology to achieve remote dormancy function, when the lamp disconnected signal automatically enter the dormant state, make the lamp more stable and safer

Heat dissipation system: the high guide light aluminum radiator is adopted, the fan intelligent monitoring technology automatically adjusts the number of fan revolutions according to the temperature of the lamp, and the built-in overheating protection intelligent system / intelligent temperature and noise balance module

Protection level: IP20, optional rain cover protection level up to IP44

Weight&Dimension

Net weight: 19 KG

Gross weight: 21 KG

Product size: 40.5 * 23.4 * 44CM

Package size: 49 * 47 * 39CM (one pack and one)

characteristic

1. Screen automatic rotation function, the system can automatically rotate the screen according to the direction of gravity, without manual rotation! You can also turn off the automatic rotation function
2. Integrated motherboard design, solve the problems of smoke oil, colored paper and so on, can separate section control control lamp beads, horse racing effect, built-in and other rich effects, the product built-in RDM remote console dial code upgrade function

SIZE DRAWING

1. Remove the packaging

Thanks for choosing to use our 1940W head-stained beam lamps. For proper and safe use, please read the instructions carefully before installing and using this product. This specification contains important installation and application information. Please strictly follow the operation procedures when installing and operating the product. At the same time, please keep this instruction manual properly.

Our 1940W bee eye shaking head dyeing beam lamp uses a new beautiful high temperature resistant engineering plastic shell and high hardness metal body. This product strictly follows the CE standard for design and production, in line with the international standard DMX512 signal protocol, can be used separately for control, can also be used online, with fast rotation, low noise, powerful features, suitable for large and medium-sized concerts, theaters, studios, nightclubs and bars and other places,

This product uses 1940W 4 in 1 lamp beads. Please remove the package carefully, check whether the product is damaged during transportation, and check whether the following contents are complete.

-----1 signal line-----1

Quick lock-----2 instructions-----1 book

2. Safety instructions

Notice!

Please be careful before operating this product. This product is a high-voltage product and you may be shocked if it touches the wires!

This product is a good product before delivery. In order to keep the product in good condition and ensure safe operation, users should follow the safety matters and the instructions.

Important: Damage caused by not following this instruction is not covered by the warranty. The supplier is not responsible for the product problems arising from this.

If the product has been exposed to extreme unstable temperature conditions (e. g., after transportation), do not supply the product immediately because water drops due to temperature changes may damage the product. Please use the product has returned to normal temperature.

This product can be used in the 90-240V voltage range and is intended for indoor use. Please ensure that the ground voltage is not higher than the tolerable range of the product!! The power plug must be plugged into a protective class I socket. Green or tea-cyan conductors must be grounded.

Please check the product-level power cord frequently. Ensure that the power cord is not folded or damaged and not connected to other wires! Special attention is required when connecting the power cord or the related wiring. Unplug the power supply without using the product or before cleaning.

Before using the product, please be familiar with the operation function of the product. Please do not expose children or no professionals to the product.

3. Operating instructions

- This product is a head dyeing beam lamp used to create dyeing performance.
- If the product after a large temperature difference (for example, after transportation), do not immediately start the product, because the heat account cold shrinkage will damage the product. Please wait until the device reaches the normal room temperature before starting the product.
- Pay attention to the shock shock. Avoid strong collisions during product installation.
- Please do not raise the whole product through the lamp head, because the mechanical nature of the equipment may be damaged.
- Make sure the product is not exposed to overheated, wet, or dusty places. Please do not place any wires on the ground or you may be in danger of suffering an electric shock.
- Before installing the product, please ensure the installation point of safety
- Please attach the product to the safety rope and check that all the screws are correct during installation
- Please make sure that the lens is in good condition. Replace the lens when the lens is damaged or scratched.
- It is recommended that the technicians familiar with the product operate the product. Non-technical personnel are prohibited from operating this equipment because many losses are the result of non-professional operations.
- Please keep the packing materials properly for secondary transportation as required.
- Do not change the product without the guidance from the manufacturer or distributor.
- Any equipment failure caused by failing to use the equipment is not covered by the warranty. And any accident caused by short circuit, injury, electric shock, ultraviolet light caused by injury, bulb explosion accidents are not within the scope of warranty.

Please ensure that this product should be installed at least 0.5 meters away from the flammable materials.

Please remember to use the safety rope as a safety guarantee, in case the accident is dropped quickly.

Hanging point: the top hanging requires that the installation personnel must be experienced, including calculating the load-bearing requirements, the installation materials used, and the periodic inspection of the safety status of the installation materials and products. If you lack this knowledge, please do not try to install it yourself. If not incorrectly, it may lead to serious consequences such as personal injury.

Make sure that all the required hanging and installation steps are completed before the product is powered on.

Quick lock hanging: there are specially designed professional pendants at the bottom of this product, including quick lock pendant and safety rope hanging points (please refer to the figure below).

When hanging this product to the truss, please remember to use a suitable quick lock, fix it to the quick lock pendant position of the product, and hang it with the screws of M10. To further ensure the safety, please install the safety rope to the safety rope hanging point at the bottom of the product, and fix it to the truss.

4. DMX-512 linkage

Please plug the male header of the XLR signal line into the signal output port of the controller and the master head into the signal input port on the back board of the product. You can talk about multiple products in series, the signal line needs to be three-heart, shielded, with XLR input and output head. Please refer to the figure below.

DMX-512 connection with terminal (loop connection)

During installation, a DMX terminal (loop connection) is recommended if the signal line is laid over a long distance, or in noisy electrical environments, such as dance halls. This avoids the digital control signal opacity due to electrical noise. The DMX terminal consists of a simple XLR connector with 2 cores and 3 cores connecting a 120 ohm resistance. Please insert the terminal into the XLR output port of the last product, please refer to the following figure.

5. Channel mode

CH32	function	DMX numeric value	description
1	red	0-255	Red for linear dimming from dark to bright
2	Red fine tuning	0-255	Red fine tuning

6. Product maintenance and cleaning

Please note the following points when testing this product:

1. All the screws and parts of the installed products must be tightly connected and do not rust.
2. The shell, lens, fixture and installation site (e. g., ceiling, hanger, truss, etc.) cannot be deformed
3. Mechanical moving parts should not have wear and tear, can not rotate unbalanced.
4. The power cord should not have any damage, material broken skin or scar, etc

The installation and use of the product must be carried out by trained professional and technical personnel, and must ensure that the safety risks are eliminated.

Note: Please unplug the power cord before maintaining the product!

order to maintain the product in good condition and extend the service life, we recommend routine cleaning of the product.

1. Clean the external lens and internal lens of the product every week to prevent the light output of the product from weakening due to the dust of the lens.
2. Clean the fan every week.
3. Every three months, professional electrical engineers will check the product in a detailed circuit, to ensure that the circuit contact is good, to prevent the circuit contact from aging due to overheating.

We recommend that the products be cleaned regularly. Please be careful not to use damp or linen, or never use alcohol or solvents.

This product is not equipped with replacement parts, please refer to the "Installation Instructions" section. If users need any spare parts, please purchase them from any local dealer.

REMARK

The product has perfect performance and integrity packing.

All users should be strictly comply with the warning and operating instructions as stated.

Or we aren't in charge of any result by misusing.

Any damage resulting by misuse is not within the Company's warranty.

Any fault or problem caused by neglecting the manual is also not in the charge of dealers.

Errors and omissions for every information given in this manual excepted.

All information is subject to change without prior notice.
